**Hoosier Changes Size Designation of Drag Bracket Radial Tire
 18860DBR**

LAKEVILLE, IND. – Hoosier is expanding the Drag Bracket Radial size to make it more versatile. The popular 18860DBR will now be designated as 31.0/10.5WR-15 instead of 31.0/11.5R15. This change will enable the tire to be used in a broader range of drag racing competitions. Previously, it was only suitable for bracket racing and NHRA super stock classes, but now it will also be usable in NMCA Nostalgia Super Stock and other Nostalgia Super Stock sanctions across the country.

Despite the new size designation, the tire will remain the same reliable and high-performing radial tire that has always been offered. The only difference is that more racers will be able to take advantage of its superior performance.

Item Number	Tire Size	Tread Width	Approx. Dia.	Approx. Circ.	Measured Rim	Section Width	Compound
18860	31.0/10.5WR-15	11.5"	31.4"	98.75"	15x14	16.0"	DBR
